V46 series Gauge Root Valves V56 series Instrument Manifolds

Pressure Rating up to 6000 psig (413 bar)

Catalog No. V56/V46-6 Jun. 2009

Features

Valves

- **Non-rotating** stem tip at closure for long-life and leak-tight shutoff.
- Chevron PTFE packing design provides far improved sealing integrity.
- Packing below stem threads is to isolate threads from system fluid and lubricant washout.
- Packing bolt permits stem **packing adjustment.**
- Standard Lock plate ensures the valve fastened to the body even excessive operating torque is applied.
- One piece body construction provides strength.
- Burr-free internal surface.

VES56 series **slotted flange** feature facilitates manifolds mounting with long stud hex nut.

D-Pro[®] Technical Data

Pressure-Temperature Ratings

Manifolds and Gauge Root Valves

	5				
Body	Packing	Temperature	Pressure Rating	Pressure Rating	
Material	material	Rating	@ 37 °C (100 °F)	@ Max. Temp.	
	PTFE	- 54 to 232 °C		285 bar@232 °C	
Stainless	FIL	(-65 to 450 °F)	413 bar	4130 psig@450 °F	
steel	Grafoil	-54 to 648 °C (1)	(6000 psig)	118 bar@648 °C	
		(-65 to 1200 °F)		1715 psig @ 1200 °F	
	PTFE	- 29 to 176 °C			
Carbon steel	PIFE	(-20 to 350 °F)	413 bar	360 bar @ 176 °C	
	Grafoil	- 29 to 176 °C	(6000 psig)	(5230 psig @ 350 °F)	
	Gialoli	(-20 to 350 °F)			

(1) Grafoil packing rating is limited to 537 °C (1000 °F) with flange end connection. In air, Grafoil rating is limited to 523 °C (975 °F), in steam it can go up to the maximum temperature of 648 °C (1200 °F).

• -28 to 204 °C (-18 to 399 °F) with optional fluorocarbon FKM flange seals.

Design

- D-Pro Manifolds and Gauge root valves are designed to ASME B16.34 Class 2500 for pressure-temperature ratings.
- Pressure boundary wetted parts are selected to Chapter III, 123 Materials of ASME B31.1.
- Valve ratings are based on ASME process piping code B31.3.
- To determine pressure rating at 37 °C (100 °F) in accordance with Power piping code B31.1, multiply by 0.94 for stainless steel.

Packing adjustment and Actuation Torque

- Extreme or rapid temperature cycle while valve in service may require packing adjustment. Tighten the packing bolt 1/16 turn clockwise.
- Valves that have not been actuated for a period of time may have a higher initial actuation torque.

Ordering and Technical Information

Every manife

- Every manifolds and gauge root valve is factory tested with nitrogen @ 69 bar (1000 psig) for leakage at the seat to a maximum allowable leak rate of 0.1 SCCM.
- Stem packing is tested for no detectable leakage.
- Optional hydrostatic shell test is performed with pure water at 1.5 times the working pressure.

Sour Gas Service

 For use valve in sour gas, materials for wetted components are selected in accordance with NACE MR0175 latest revision.

	Manifalda	Basic Ordering	End Conn	ections	Orifice	Weight

How to order manifolds with options

- To order the optional Grafoil packing, add -GF to the ordering number. i.e., VES56-3V1F8N-GF-
- To order sour gas service valve, add-SG to the ordering number. i.e., VES56-3V1F8N-GF-SG-
- To order optional GRAFOIL or FKM O-ring flange seal, add -GF or -VT to the ordering number/ i.e., VES56-3V1F8N-GF-SG-GF(or- VT)-Flange seal designators: -GF for Grafoil, - VT for FKM O-ring.
- To complete the ordering number, select valve body material designator:
 S for SS316, C for Carbon steel. i.e., VES56-3V1F8N-GF-SG-VT-S.

Manifolds Accessories

Flange Bolts

For special mounting applications optional long and short bolts are available. See flange bolt specification below.

Flange Bolt	Threads	Length mm (in.)	Hex Size mm (in.)	Basic Ordering Number	Bolt Material Designator
Standard hex bolt	7/16-20	45.0 (1.77)	15.87	Z56BM-	
Long stud hex nut	7/16-20	58.0 (2.28)		Z56BL-	Stainless steel: S
Short hex head bolt	7/16-20	25.0 (.98)	(5/8)	Z56BS-	Carbon steel: C

To order, add the material designator to the bolt ordering number. i.e., Z56BM-S

Slotted flange manifolds is supplied with long stud hex nut: Z56BL-

Flange Seals

Flange seals are available in standard PTFE, Grafoil and fluorocarbon FKM O-ring for system compatibility.

Seal Material	Temperature Rating °C (°F)	Ordering Number	
PTFE	-53 to 121 (-65 to 250)	Z56PE	
Grafoil	-53 to 537 (-65 to 1000)	Z56GF	
Fluorocarbon FKM (Viton)	-28 to 204 (-18 to 399)	Z56VT	

To order, use the ordering number. i.e., Z56PE.

Oval Flange & Pipe Nipple

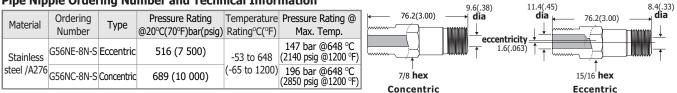

Eccentric Flanges and Pipe Nipple allow connections of flange-to-flange manifolds to process flange taps or process root valves.

Oval Flange

Oval Flange Ordering Number and Technical Information

Pipe Nipple	Material	End Connection	End Connection Size	Ordering Number	
	Stainless steel	Female NPT	1/2 in. NPT	V560F-8N-S	
	Carbon steel		1/2 III. INP I	V560F-8N-C	

Pipe Nipple Ordering Number and Technical Information

Calibration Fittings

Select DK-LOK differential pressure calibration fitting depending on the bleed port of the transmitter plug.

Ordering Number

Material	Ordering Number	DK-LOK OD	Straight Male Thread
Stainless	DPCM4-1U-S	1/4 in.	1/4-28UNF
steel /A276	DPCM4-2U-S	1/4 111.	5/16-24UNF

Mounting Bracket Kit

Bracket kit containing bracket, U-bolt, bolt, nut and washer allows horizontal and vertical manifold mounting.

Bonnet valves are available for field assembly.

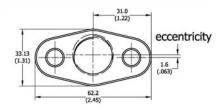

Bonnet Valve	Basic Ordering	Packing Material	Bonnet Valve	
	Number Designato		Material Designator	
Small Bonnet Valve	V56SV-	PTFF: Nil	Stainless steel: S	
Medium Bonnet Valve	V56MV-	Grafoil: GF		
Large Bonnet Valve	V56LV-		Carbon steel: C	

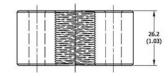

• Kit contains bonnet valve, lock plate and set screw.

How to order

Select designator for the desired packing and valve material. i.e., V56SV-GF-S

V46 Series

D-Pro^{*} Gauge Root Valves

D-Pro V46 series Gauge Root Valves

D-Pro Gauge Root Valves offer a safe way of positioning gauges and installing pressure switches.

Features

- 1/2 in. and 3/4 in. male to 1/2 in. female end connections.
- 1/2 in. female gauge ports standard.
- Minimum schedule 160 pipe wall on valve inlet.

Ordering Information and Technical Data

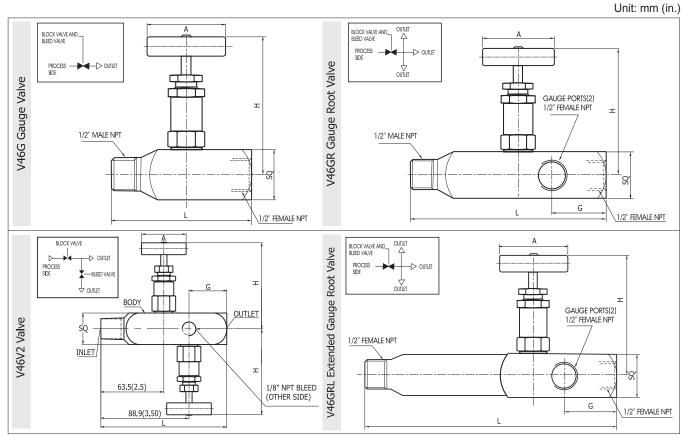

Valve Ordering Number	End Connection Male to Female NPT	Orifice mm (in.)	Body Length mm (in.) L	MAX. OPEN H	SQ	G	А
V46G-8N-S	1/2 to 1/2 in.	5.0 (.20)	90.0 (3.54)		32(1.26)	-	50.00(1.97)
V46GR-8N-S	1/2 to 1/2 in.		136.0 (5.35)			38.10(1.50)	
V46GR-12N8N-S	3/4 to 1/2 in.		136.0 (5.35)	85.9(3.38)			
V46GRL-8N-S	1/2 to 1/2 in.		184.0 (7.24)	05.9(5.30)			
V46GRL-12N8N-S	3/4 to 1/2 in.		184.0 (7.24)				
V46V2-8N-S	1/2 to 1/2 in.		127.0 (5.00)				

• V46GRL has an extended 4.8 inch of pipe insulation.

• V46 series uses Medium Bonnet Valve: Orifice 5.0 mm (.196in.)

How to order

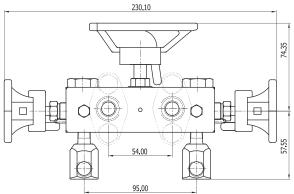

- To order Grafoil option, insert -GF in the ordering number. i.e., V46G-8N-GF-S
- To order sour gas service valve, insert -SG in the ordering number. i.e., V46G-8N-GF-SG-S

D-Pro[®] Gauge Root Valves

Chemical Injection Kit

Chemical Injection Kit: CIK-8N-SA

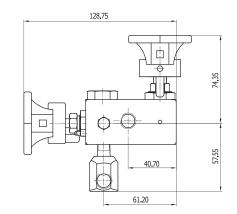

- Pressure Rating: 6,000psig@100°F (38°C)
- Body & Bonnet Material: ASTM A276/A479 type 316
- Stem Material: ASTM A276/A479 type 316
- Stem: Non-rotating
- Stem Packing: PTFE
- Spring Material: SS302
- Nominal Cracking Pressure: 5 psig

Safe Valve Selection

The selection of a valve for any application or system design must be considered to ensure safe performance. Valve function, valve rating, material compatibility, proper installation, operation and maintenance remain the sole responsibility of the system designer and the user. Dk Tech accepts no liability for any improper selection, installation, operation or maintenance.
